# **EXHIBIT C**

# IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant(s): Shigeru Yokono et al.

Appl. No.: 10/016,242

Conf. No.: 7869

Filed: October 30, 2001

Title: DOWNLOADING SYSTEM

Art Unit: 2155

Examiner: Tran, Philip B. Docket No.: 112857-250

Mail Stop RCE Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

#### AMENDMENT AFTER FINAL

Sir:

In reply to the final Office Action dated November 27, 2006 please amend the above-identified patent application as follows:

Amendments to the Claims are reflected in the listing of claims which begins on page 2 of this paper.

Remarks begin on page 4 of this paper.

### Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

### **Listing of Claims:**

Claims 1-26 (canceled).

Claim 27 (currently amended): A <u>portable recording medium storage device used with a downloading apparatus for recording and physically transporting digital data, comprising:</u>

an storage assembly have a predetermined shape and being adapted to be received by or loaded into the data downloading apparatus of a data downloading system; and

a main recording surface have at least two different recording areas including at least a first non-rewritable recording area in which is recorded download identification information for designating information to be downloaded to the recording medium storage device when the storage device recording medium is loaded in the a data downloading system, and medium identification information for identifying the recording medium storage device[[;]] as permitted in the downloading system, and a second rewritable recording area for recording digital data identified by the download information,

wherein the digital data is <u>automatically</u> recorded on the <u>recording medium portable</u> <u>storage device</u> by the <u>data recording downloading</u> system when <u>the portable storage device is loaded into the data downloading apparatus and the medium identification information is <u>recognized as being</u> authorized for recording the digital data.</u>

Claim 28 (currently amended): The A recording medium device according to claim 27, further comprising a third area of the main recording surface in which information can be recorded as use record information about regarding various processing[[s]] executed by the downloading system when the recording medium is loaded in the downloading system to which the recording medium is adapted.

Claim 29 (currently amended): The A recording medium device according to claim 27, further comprising a fourth area of the main recording surface in which information can be

recorded as fee record information of fees charged with respect to various processings executed by the downloading system when the recording medium is loaded in the downloading system to which the recording medium is adapted.

Claim 30 (canceled)

Claim 31 (new): A method of using a portable storage device in a data downloading system for recording and physically transporting digital data, the method comprising:

recording in a first non-rewritable recording area of the portable storage device download identification information for designating information to be downloaded to the storage device and medium identification information identifying the storage device as permitted in a data downloading apparatus of the data downloading system;

loading in the data downloading apparatus the portable storage device, the portable storage device having a predetermined shape adapted to be received by or loaded into the data downloading apparatus; and

automatically downloading or recording in a second rewritable recording area digital data identified by the download information,

wherein the digital data is recorded on the storage device by the data downloading system when the medium identification information is authorized by the data downloading apparatus for recording the digital data.

- 32. (new) The method of claim 31, further comprising recording in a third area of the portable storage device use record information regarding various processing executed by the data downloading system when the portable storage device is loaded in the data downloading system.
- 33. (new) The method of claim 31, further comprising recording in a fourth area fee record information of fees charged with respect to various processings executed by the data downloading system when the portable storage device is loaded in the data downloading system.

#### **REMARKS**

This Response is submitted in reply to the final Office Action dated November 27, 2006, issued in connection with the above-identified application. Claims 27-30 are presently pending in the application. With this Response, claims 27-29 have been amended, claim 30 has been canceled, and claims 31-33 have been added. No new matter has been introduced as a result of this Response; thus, favorable reconsideration is requested.

Claims 27-29 stand rejected under 35 U.S.C. §101 for being directed to non-statutory subject matter. The Examiner alleges that the claims appear to be abstract ideas rather than a practical application of the idea. The Applicants have amended the claims to more clearly point out that they are directed to *an apparatus and not an abstract idea*. In this case, a "portable storage device" having novel structure. Thus, the claims as amended are now believed to fall into one or the four enumerated categories of patentable subject matter under 35 U.S.C §101.

Claims 27-28 stand rejected under 35 U.S.C. §102(e) as being anticipated by Nakashima et al. (U.S. Patent No. 5,930,825, hereafter "Nakashima"); and claims 29-30 stand rejected under 35 U.S.C. §103(a) as being unpatentable over Nakashima in view of Schoen et al. (U.S. Patent No. 5,592,511, hereafter "Schoen"). The Applicants respectfully traverse these rejections.

The Applicants have amended independent claim 27 to clarify that the apparatus of the present invention is directed to a portable storage device used with a downloading apparatus for recording and physically transporting digital data, which includes the following structural features:

- 1) an storage assembly have a predetermined shape and being adapted to be received by or loaded into the data downloading apparatus of a data downloading system; and
- 2) a main recording surface have at least two different recording areas: a) a first non-rewritable recording area in which is recorded download identification information for designating information to be downloaded to the storage device when the recording medium is loaded in the data downloading system, and medium identification information identifying the storage device as a permitted device; and b) a second rewritable recording area for recording digital data identified by the download information. An important feature of the present invention is that the digital data is *automatically* recorded on the portable storage device when the portable storage device is loaded into the data downloading apparatus and the medium

identification information is recognized as being authorized for recording digital data (see, Applicants' Application, page 4, line 1-page 5, line 8; Fig. 4; and Figs. 6A-6C).

In the Office Action, the Examiner relies on Nakashima for disclosing all the features recited in independent claim 27. However, Nakashima is directed to a method of protecting software from being unlawfully copied from a disc (storage device) to a computer system using medium ID information. More specifically, if an optical disk (containing software/data) is indicated as an original, the data on the optical disk is executed for downloading *from the optical disk to, for example, a PC*. However, if the optical disk is indicated as a copy, then a warning or other message is displayed and the copy operation is halted (see, Nakashima, col. 14, line 60 – col. 15, line 43).

Thus, the medium ID information disclosed in Nakashima is used for identifying data to be downloaded from the portable storage device to a system or PC. Additionally, nothing about the downloading of information appears to be automatic when the portable storage device is loaded. For example, after the optical disc is loaded, the user is required to enter "SAMPLE.TXT" from a keyboard. The host then acquires the necessary application program. (see col. 7, lines 12-19). Therefore, Nakashima does not disclose the claimed second recording area for recording digital data identified by download information; mainly, because no information is downloaded from the PC to the optical disk. Additionally, the downloading of information (albeit from the optical disk to the PC) is not automatic.

Moreover, Schoen does not overcome the deficiencies noted above in Nakashima. Therefore, even if one of ordinary skill in the art were to combine the teachings of Nakashima and Schoen, the combination still would not teach or suggest all the features recited in at least independent claim 27 (as amended).

Independent claim 27 is distinguished over the cited references for at least the reasons noted above. Likewise, dependent claims 28-29 are also distinguished over the cited references based on their dependency on independent claim 27. Additionally, new claims 31-33 are distinguished over the cited references for similar reasons.

In light of the above, the Applicants respectfully submit that all the pending claims are in condition for allowance. Thus, a timely Notice of Allowance is respectfully requested. The Director is authorized to charge and credit Deposit Account No. 02-1818 for any additional fees

Appl. No. 10/016,242 Reply to Office Action of November 27, 2006

associated with the submission of this Response, including any time extension fees. Please reference docket number 112857-250.

#### INFORMATION DISCLOSURE STATEMENT TRANSMITTAL LETTER

Sir:

Submitted herewith is an Information Disclosure Statement for consideration in the above-identified application. In accordance with the provisions of 37 C.F.R. 1.56, 37 C.F.R. 1.97, and 37 C.F.R. 1.98, Applicants request that a citation and examination of the references cited on the enclosed PTO-1449 form be made during the course of examination of the above-identified application for United States patent. Pursuant to 37 C.F.R. 1.98, copies of any cited foreign patent documents and non-patent documents are enclosed.

This Information Disclosure Statement is submitted:

]	Within three months of filing of a national application; within three months of the date of entry of the national stage as set forth in 37 C.F.R. §1.491 in an international application; before the mailing date of a first Office Action on the merits, or before the mailing of a first Office Action after the filing of a Request for Continued Examination.
]	After the period specified above, but before the mailing date of a Final Action under 37 CFR 1.113, a Notice of Allowance under 37 CFR 1.311, or an Action that otherwise closes prosecution in the application and is accompanied by one of:

- [ ] Payment of the fee set forth in 37 CFR 1.17(p); or
- [ ] The certification specified in 37 CFR 1.97(e) follows.
- [X] After the mailing date of a Final Action under 37 CFR 1.113, a Notice of Allowance under 37 CFR 1.311, or an Action that otherwise closes prosecution in the application and is accompanied by the fee set forth in 37 CFR 1.17(p) and the certification specified in 37 CFR 1.97(e) follows.

- [ ] The undersigned counsel for applicant(s) hereby certifies each item of information contained in the accompanying Information Disclosure Statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the Information Disclosure Statement.
- [] The undersigned counsel for applicant(s) hereby certifies that no item of information contained in the accompanying Information Disclosure Statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the undersigned, after making reasonable inquiry, no item of information contained in the accompanying Information Disclosure Statement was known to any individual designated in 37 CFR 1.56(c) more than three months prior to the filing of the Information Disclosure Statement.
- [X] A copy of a Search Report from a corresponding foreign patent application (Japanese Patent Application No. 09-305612) is enclosed.
- A check in the amount of \$180 to cover the required fee is enclosed.
- [ ] The Commissioner is hereby authorized to charge the amount of \$180 to cover the required fee to Deposit Account No. 02-1818.
- [X] The Commissioner is hereby authorized to charge any additional fees which may be required, or credit any overpayment to Deposit Account No. 02-1818.

Respectfully submitted,

BELL, BOYD & LLOYD LLP

BY

Thomas C. Basso Reg. No. 46,541 Customer No. 29175

Dated: January 30, 2007

The submitted reference was prepared by a foreign Patent Office, and is directed to a foreign counterpart application to the present US Patent Application. Consistent with Applicant's duty of disclosure under 37 CFR 1.56, Applicant recognizes that the Examiner may consider it relevant when making a patentability determination. However, this submission should not be misconstrued as an admission by the Applicant that the reference is either relevant or not relevant to patentability, especially since the reference was prepared by a foreign Patent Office that is governed by a different body of law than the USPTO.

Nevertheless, in the interest of full disclosure and good faith, Applicant submits the reference for consideration by the Examiner, and requests that the Examiner initial the attached Form PTO 1449, indicating the Examiner has considered this reference.

#### Notification of Reasons for Refusal

Patent application number

1997-305612

Drafting date

September 5, 2006

Examiner

Ako Shuichiro

3145 5B00

Representative of the applicant

Waki Atsuo (one other partner)

Applicable articles

the body of Article 29; Article 36

This application should be refused according to the following reasons. If there are any opinions concerning this refusal, please file an argument within 60 days from the transmittal date of this notification.

#### Reasons

1. For this application, the description of the claims does not satisfy the requirements prescribed in article 36, paragraph 6, item 2 of the Patent Law in the following points.

#### Note

(1) It is not clear what kind of information is specifically referred to by the text, "the information saved in said recording media" in claim 1. In addition, a relationship between the information and "download ID information" is not clear.

The same applies to claim 17.

(2) In the text, "a confirm process for use conditions using the information saved in said recording media" and "a download process of predefined information for said recording

media based on download ID information" in claim 1, it is not clear how to specifically use "the information saved in said recording media" and "download ID information".

The same applies to claims 2, 3, 5, 6, and 17 - 19.

- (3) In connection with the above mentioned reason 1. (2), it is not clear what kind of process is specifically referred to by the underlined text in "regarding said download process or said confirm process for use conditions when using said download terminal, necessary information communication is executable between said download terminal and said server system" in claim 1.
- (4) In connection with the above mentioned reason 1. (3), in the text, "it is done by communicating serial number information, user ID information, and password information

P. 2

between said download terminal and said server system" in claim 7, it is not clear where (in other words, which of the "download terminal" or the "server system") and how the communicated "serial number information, user ID information, and password information" are utilized.

(5) In the text, "the transfer means to transfer the input means between a usable state and an unusable state" in claim 14, it is not clear what is referred to – or what kind of thing is specifically referred to – by the "transfer means" for transferring something between a "state" and a "state".

The same applies to claim 26.

(6) It is not clear what kind of information is specifically referred to by the text, "information used for download use" in claim 16. In addition, a relationship between the information and "the information saved in said recording media"/"download ID information" in claim 1 referred by claim 16, is not clear.

Therefore, the invention relating to claims 1 - 26 is not clear.

2. Because the invention relating to the following claims in this application does <u>not satisfy</u> the requirements prescribed in the body of article 29, paragraph 1 of the Patent Law in the following points, the right to the patent shall not be granted.

#### Note

While the invention relating to claims 27 - 29 in this application is regarding a recording media used by a download system, because in the recording media, only a data structure stored in the recording media has a characteristic, and the data structure itself is based only on a man-made arrangement, it does not utilizes the law of nature. Furthermore, because it cannot be said that the information processing using the data stored in the recording media is achieved specifically by using hardware resources, the invention

relating to claims 27 – 29 is not an invention utilizing the law of nature after all.

Therefore, because the invention relating to claims 27 - 29 in this application is not an invention utilizing the law of nature, it does not correspond to the "invention" in the body of article 29, paragraph 1 of the Patent Law.
